COMPARATIVE MARKET ANALYSIS

14515 NC Hwy 73

Huntersville, NC 28078 · Waterfront Land · 2.13 Acres

RECOMMENDED LIST PRICE

\$3,750,000

Presented by **Ryan Palmer** · Corcoran HM Properties

THE OPPORTUNITY

A Rare Blank Canvas on *Wide Open Water*

14515 NC Hwy 73 is not simply a waterfront lot — it is the largest, flattest, most buildable piece of prime Lake Norman waterfront currently available. Wide open water views and 2.13 acres of cleared, ready land put this property in a category of its own.

Wide Open Water Views

The defining feature of this lot. Unobstructed Lake Norman views that luxury buyers pay millions to secure. Better views than the \$4.49M off-market sale next door.

2.13 Acres — Largest in the Analysis

Every comp in this CMA sits on less than 1.5 acres. The subject lot is nearly 2× the nearest comparable. More land means more options, more privacy, more value.

Flat, Cleared & Fully Buildable

Raw, cleared land ready for construction. No grade challenges, no power-line easements, no site constraints limiting the build. A true blank canvas.

Pier-Eligible Shoreline

The lot supports a private pier — none is currently installed. The right buyer can build to spec. Pier installation priced into the analysis at \$150K–\$200K.

Dream Home Build Site

Luxury buyers aren't purchasing land — they're purchasing the life they'll build on it. This lot delivers the water, the acreage, and the canvas to do it right.

NC-73 Corridor — Established Demand

The same road saw an off-market waterfront sale at \$4.49M. Buyer demand along this corridor for premium waterfront is confirmed and growing.

MARKET INTELLIGENCE

Who Buys This Property and Why They Pay For It

The buyer for 14515 NC Hwy 73 is not someone who couldn't afford The Peninsula or The Point. They're someone who chose not to. They're building a \$7.5M+ estate — \$3.75M for land, \$3.75M+ in construction — and they want the one thing a

prestigious zip code can't give them: land, privacy, and wide open water with no compromises.

The Estate Builder

They have a vision for a custom home that demands acreage. Peninsula lots under an acre won't accommodate it. This 2.13-acre flat, cleared canvas is exactly what they've been waiting for.

The View Buyer

Wide open water is the rarest commodity on Lake Norman. This buyer has seen the crowded, tree-lined lots in prestigious communities and walked away. They want unobstructed horizon. This lot has it.

The Privacy Seeker

The Peninsula and The Point are beautiful — and social. This buyer trades the social cachet for space and seclusion. At 2.13 acres they can build setbacks, landscape buffers, and a private retreat that Peninsula lots simply cannot offer.

MARKET BENCHMARK • PENINSULA SALE • 2024

Premium Peninsula Property — Sold \$11,500,000

A premium Peninsula-area waterfront property sold last year at **\$11,500,000**. This is the ceiling of what the Peninsula delivers — the very best location, the social prestige, the established luxury neighborhood. It is the benchmark for what buyers pay when they want everything.

What this tells us: The buyer who spent \$11.5M in Peninsula paid a location premium on top of everything else. The buyer for our subject property is making a different — equally deliberate — choice: more land, more privacy, wider water, less social noise. At \$3.75M for land and \$3.75M+ to build, their all-in investment of \$7.5M+ delivers an estate that the \$11.5M Peninsula buyer would recognize as their equal in quality — and their superior in privacy and open water.

\$11.5M

PENINSULA • SOLD 2024

The Peninsula & The Point Premium

\$7.5M+ Total Investment — By Choice

Belle Isle and similar communities carry a proven location premium — lots trading at \$3.7M–\$3.85M on under an acre. The subject is not in Peninsula, and that is an honest and accounted-for adjustment in this analysis. But the buyer for this property isn't choosing between this lot and a Peninsula lot.

They're choosing between this lot and nothing — because nothing else on the lake offers 2.13 flat, cleared acres with wide open water at this price.

This is not a buyer looking for a deal. At \$3.75M for the land and \$3.75M+ to build their custom home, they're investing \$7.5M+ total — by design. They could have bought in The Point. They chose this. The wide open water view from their future great room is worth every dollar of the difference.

"The buyer for this property isn't settling for less than Peninsula — they're getting more than Peninsula can offer. More land, more privacy, and the widest open water on the lake."

"At \$7.5M+ all-in, this is a deliberate choice by a buyer who knows exactly what they want. Our job is to find them — and this lot is worth every dollar of the ask."

COMPARABLE SALES & LISTINGS

The Market Speaks

Twelve properties across three distinct groups define the pricing envelope for 14515 NC Hwy 73 — a ceiling set by premium waterfront, a floor set by view-limited corridor lots, and market lessons from listings that misjudged their position.

Premium Waterfront — Setting the Ceiling

Belle Isle Peninsula + NC-73 off-market · \$3.7M–\$4.49M

clearly. Pricing discipline
matters — the right price
attracts the right buyer
quickly.*

PRICING ANALYSIS

Working Backwards to \$3,750,000

The right way to price land isn't bottom-up — it's top-down. Start with what a buyer is willing to pay for the finished home, subtract the cost to build it, and what's left is what the land is worth. This is how the right buyer will think. And this is how we arrived at \$3.75M.

WHAT WOULD SOMEONE PAY FOR THE FINISHED HOME?

\$11M – \$15M+

A custom-built luxury lakefront estate on 2.13 acres with wide open water views — the finished product — would command \$11M–\$15M+ on Lake Norman. A premium Peninsula property sold at \$11.5M last year. This lot, with better views and more land, supports a finished home value at or above that ceiling for the right buyer and the right build.

– COST TO BUILD THE HOME

–\$4M – \$5M

A custom luxury build of this caliber on Lake Norman — the kind of home that belongs on this lot — runs \$3.5M–\$6M+ in construction, depending on size, finish level, and design. The buyer building to the full potential of this site should budget \$4M–\$5M to build. That's not a guess — it's the cost of doing it right.

– PIER, LANDSCAPING & SITE WORK

–\$400K – \$600K

No pier is currently installed — buyer adds \$150K–\$200K for pier construction. Site preparation, landscaping, driveway, and exterior finishing on a 2.13-acre lakefront estate adds another \$200K–\$400K. Call it \$400K–\$600K total for everything beyond the home itself.

– LOCATION & NOISE ADJUSTMENT

–\$300K – \$500K

Not in Peninsula or The Point — that's a real and honest discount vs. the \$11.5M Peninsula benchmark. NC-73 road noise is a modest negative. Combined, these factors reduce the finished home value and therefore the residual land value. Accounted for honestly.

RESIDUAL LAND VALUE — WHAT'S LEFT FOR THE LOT

\$3,750,000

Working backwards: a \$11M–\$12M finished home value, minus \$4M–\$5M to build, minus \$400K–\$600K in site work, minus \$400K+ for location, leaves \$3.5M–\$4.5M in residual land value. \$3,750,000 sits squarely in the middle of that range — honest, defensible, and supported by every comp in this analysis. This will take a special buyer. But that buyer exists, and they will recognize the value immediately.

"This buyer isn't settling for less than Peninsula — they're getting more than Peninsula can offer. At \$7.5M+ all-in, they're building the most private, view-dominant estate on the lake. The land alone is worth \$3.75M."

"A property sold in a premium Peninsula community last year at \$11.5M. Our buyer is making a different choice — and a smarter one. More land, wider water, and a custom home built exactly to their vision."

OUR RECOMMENDATION

RECOMMENDED LIST PRICE

\$3,750,000

This is the right number. It is grounded in market evidence, honest about the subject's limitations, and appropriately bold about its extraordinary strengths.

- Wide open water views confirmed at \$3.7M–\$3.85M in Belle Isle comps
- \$4.49M off-market NC-73 sale confirms corridor demand above \$4M
- 2.13 acres — the largest buildable lot in the analysis
- Flat, cleared, pier-eligible — no construction constraints
- Honest adjustments for location, pier, and road noise applied
- Positioned to attract the serious \$3M+ Lake Norman buyer immediately
